

LONPOS 4D PUZZLE GAME - PYRAMIDS:

The game is played on **432 different levels**, with **more than 22'000 possible solutions**, therefore it is suitable for all: for every age, every IQ, for "fast" or "slow" people; **everyone will find his challenge - again and again!** The highest levels includes many flat or three-dimensional, various large pyramids (see picture).

You can play it alone, play with a partner or in groups (and this is particularly funny).

A game consists of two complete half-round game boxes, five instruction books (all in German, French, Spanish, English and Italian or Japanese) and other playing material: a dice-box – the “Random” – it determines where necessary, the next task, an hourglass to play against time against; coloured pencils to record solutions.

A play-box requires very little space (some of the task-books can be housed in the lid), and can be taken anywhere in the pocket. LONPOS 4D PUZZLE GAME is thus an ideal travel companion!
