year

except haaga 250

This is how Haaga sweepers earn their special distinction

- 1. The one-of-a-kind disc brush system from Haaga > 2., 4., 6..**
Unlike other sweeping devices we rely on our patented disc brush technology. Here two specially-made, opposing circular brushes cut under the waste material and whisk it directly into the waste container. Here, the coarse or fine debris is not „run over“ or pushed around in front the sweeper. Even wet leaves are neatly collected.
- 2. Twice the sweeping capacity with Haaga's Turbo sweeping system > 4., 6..**
In addition to the disc brush system, our 400 and 600 series machines have an additional fine-particle roller brush that is mounted behind it. This allows these machines to effectively sweep twice with one pass. Even the most fine debris is collected.
- 3. Very low dust thanks to an intelligent airflow > 4., 6..**
All of the 400 and 600 series machines (except for the haaga 475) are equipped with two special fine particle filters. The dusty air is cleaned by these filters inside of the machine and then returned to the sweeping circuit. The user does not stand – as is so often the case – behind the machine in a thick dust cloud.
- 4. Four year wear guarantee on the brushes > 2., 4., 6..**
Our guarantee of four years is unmatched in this industry and ensures you the full sweeping performance of your sweeper for a very long time.

The unbeatable characteristics of Haaga sweepers become apparent as soon as these machines are in action.

- 1. Effortlessly sweep up fine and coarse dirt (from sand to beverage cans) – be it dry or wet.**
- 2. Sweep up wet leaves as well, which is especially difficult**
- 3. The disc brushes, which protrude on both sides ensure even greater sweeping performance.**
- 4. Pleasant, easy running thanks to the belt-less drive, which also ensures a long service life**
- 5. Additional guide rollers for easy sweeping along curbs and walls**
- 6. The infinitely variable brush height adjustment ensures optimal cleaning performance on various types of surfaces**
- 7. Space-saving storage, without loosing any of the collected dirt**

haaga 200 series

haaga 255

the top range model for home and garden use
e.g. side walks, garage entries, streets

- > with disc brush system
- > performance: 1,600 m²/h
- > weight: 6 kg
- > container volume 25 l
- > with many features which Haaga sweepers characterize
- > with both side overlaying disc brushes
- > side rollers on both sides
- > 4 year warranty on disc brushes

haaga 255

cleaning width 55 cm
