

## The SWISSREX Workshop System - an overview:

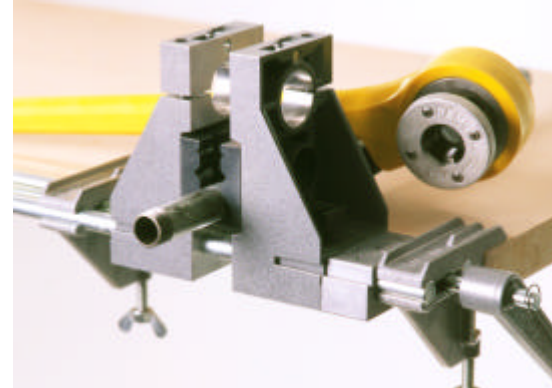

**The SWISSREX Workshop basic box includes the following top quality features:**

- the basic vice with it's 2 jaws with speed-adjustment and two bench clamps - both jaws includes a housing for drills and motors with a neck of 43mm Ø (38mm Ø adapters available)
- steel jaw covers, to protect the main vice clamping faces
- reinforced soft jaw covers, to protect delicate materials
- profiled jaws for clamping tubes and irregular shapes
- an additional clamp system, for holding items of any length
- comprehensively illustrated easy-to-follow instructions

**Whether for production, assembly, repairs or other requirements - the SWISSREX Workshop System is your perfect partner:**

Use it as a planning bench (of any length) to secure wood for planning, sawing, woodcarving etc. or as a protective vice to secure heavy duty or very delicate objects!

## THE SWISS SUPERTOOL - with 5-year guarantee!

Ideal for securing very bulky or awkward items; or just with the vice clamps for other work.

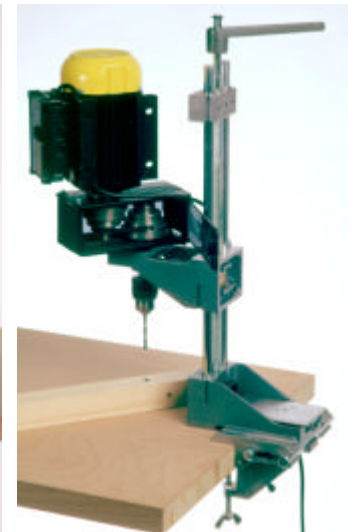

**LIVE demonstration is available on YouTube.**

Please find our demonstration videos in your preferred language version (English, Spanish, French, Italian, German) on YouTube.

Convert your SWISSREX Workshop into a stand for your router or a vertical drill press, no accessories required!

Or with accessories:

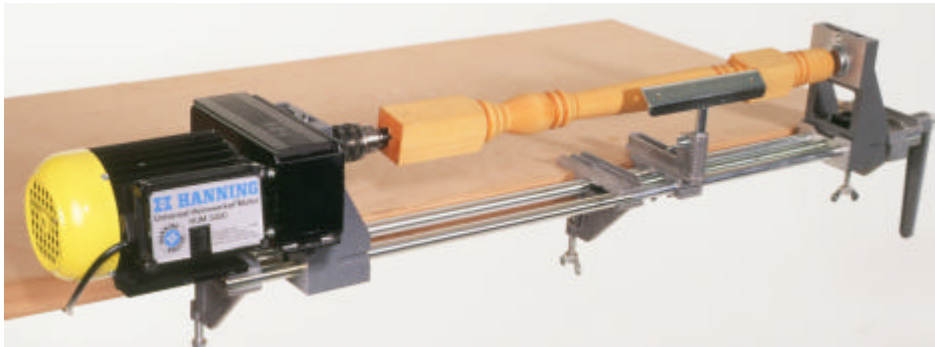

Attached to the board for routing and drilling, or freely movable, ideal for repeating holes, even at an angle! Optional drilling lever and the drilling table Setup with drilling plate: 4mm (5/32") depth per turn

Use your SWISSREX Workshop System as a precision woodturning lathe (with no length restrictions!).

Add the woodturning attachment, use your own drill - and you're ready to go!

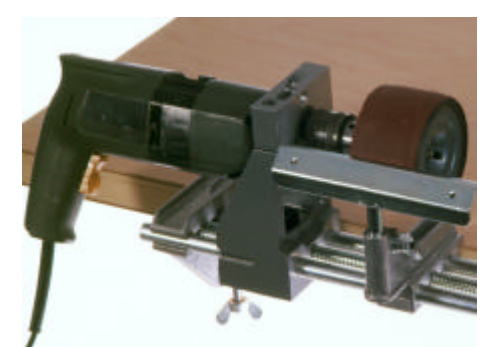

Or work with our excellent silent, strong motor, gearbox and belt.

Choose REDEX premium woodturning chisels!

Add even more value! Use the SWISSREX tool rest for sanding and polishing with a disc or drum, attached to your drill or motor!

More accessories on demand

We sell as well copiers, 4 jaw safety chucks, woodcarving tools, special motors, router bits, frame-clamps (framing straps) and lot's of other very handy p recision tools.
